SUMMARY

I am a passionate web developer with 3 years of experience in both front-end and back-end technologies, including the latest Angular 18 and .NET Core. With a solid foundation in HTML, CSS, JavaScript, and SQL Server, I thrive on tackling challenges and driving innovation. My strong interpersonal skills, time management, and problem-solving abilities make me a valuable asset to any team. I am eager to contribute meaningfully and continue growing professionally in a dynamic and fast-paced environment.

SKILLS

Front-end: HTML5, CSS3, JavaScript, JQuery, AngularJs, Ajax, Bootstrap, TypeScript, Angular 18, Angular Material.

Back-end: C, C#, ASP.NET Core, .NET Framework, Webforms, API Integration, RESTApis, LINQ.

Database : MS SQL, MySQL.

Technology: Git, GitHub, Visual Studio, RDP.

EDUCATION

Pursuing (Last Year)	Indira Gandhi National Open University Bachelor of computer application	BCA
May 2021	Rajokari institute of technology Diploma in Computer Science (69%)	Engineering
May 2018	Govt boys senior secondary school Complete my 10th standard (65%)	School

EXPERIENCE

06/2022 – Present	Planet E-Com Solution Pvt. Ltd. - Full Stack Developer	Peeragarhi New delhi
I am a full-stack developer with 3 years of experience, currently excelling in delivering successful projects while collaborating closely with my team. In my current role, I primarily focus on backend development while also working with Angular for the front end, effectively contributing as a full-stack developer. Over this period, I have developed strong skills and continuously seek opportunities to improve. My expertise includes working with technologies such as .NET Framework, .NET Core 6.0, and Angular 18, and I take pride in contributing to the success of each project we undertake. <i>Key Technologies/Tools:</i> .NET Framework, .NET Core 6.0, Angular 18.		

PROJECTS

Canara Bank Project canarabank.com
Description: Developed a website for Canara Bank, highlighting its rich history and customer-centric approach. The website details the bank's founder, Shri Ammembal Subba Rao Pai, and its establishment in July 1906 in Mangalore, Karnataka. It showcases the bank's growth trajectory over the past century, especially after its nationalization in 1969, when it became a national-level player with a wide geographical reach and diverse clientele. The website also discusses the bank's business diversification in the 1980s and its completion of a century of operations in the Indian banking industry in June 2006.
Role: Worked as a backend developer responsible for implementing core business logic, integrating the database, writing stored procedures, and contributing to UI design enhancements.
Technology: CSS, MVC Core, MS SQL, Stored Procedures, LINQ.

DMRC (Medical Card Portal)

Description: Developed an API for the DMRC Medical Card app, designed to securely manage and display DMRC employee and dependent data by integrating with the SAP system. The solution features role-based login to ensure personalized access based on user roles, while sensitive data is encrypted for security. The system dynamically fetches and presents employee and dependent information from SAP, providing a seamless and secure user experience for healthcare service management.
Role: Focused on backend development, including API creation, encryption-decryption logic, and SAP integration. Also contributed to database design and stored procedures.
Technology: .NET Core, Razor pages, CSS, LINQ, Encryption-Decryption, MS SQL, Stored Procedures, JQuery.

Family Estate Manager (FEM)familyestatemanager.com

Description: The Family Estate Manager is a multilingual platform designed to simplify estate planning and settlement. It offers practical advice, step-by-step instructions, and tools to create legal documents such as wills, healthcare proxies, and powers of attorney. Users can consult with legal professionals, calculate estate value, minimize taxes, and organize communication with relevant parties. The system is applicable in all 50 states, the District of Columbia, and Canada, and provides access to articles, FAQs, and best practices.

Role: Handled backend development, database integration, and business logic. Also maintained and enhanced web-forms and client-side features.

Technology: .NET Framework, Web-Forms, MS SQL, Stored Procedures, jQuery, AJAX, CSS.

National Business School (NSB)

Description: Developed a website containing details of lecturers and posts related to the school.

Role: Worked on frontend implementation and assisted with backend integration.

Technology: Angular 14.

MRPLmrpl.co.in

Description: MRPL is a Category 1 Miniratna Central Public Sector Enterprise (CPSE) under the Ministry of Petroleum & Natural Gas. Located north of Mangaluru city in Karnataka State (India), the 15.OMMTPA Refinery processes various Crudes to produce Naphtha, LPG, Motor Spirit, High-Speed Diesel, Kerosene, Aviation Turbine Fuel, Sulphur, Xylene, Bitumen, Pet Coke, and Polypropylene.

Role: Managed backend development, database design (tables and procedures), and implemented core functionalities using LINQ.

Technology: MVC Core, MS SQL, Stored Procedures, LINQ.

PNB Positive Pay System

Description: Implemented a Positive Pay System to reduce fraud in high-value cheque payments.

Role: Focused on backend logic and Angular integration, including secure form validations and user interface components.

Technology: Angular 16.

ACADEMIC PROJECTS**Food App (Admin Panel and API)**Foodapp.in

Description: Developed a Food App Admin Panel using Angular 18 and a backend API with .NET Core. The Admin Panel allows managing food items, orders, and user data, while the API handles server-side operations and database interactions.

Technology: Angular 18, .NET Core API.

Plant Management System

Description: Developed a web-based application for plant management, including user and plant CRUD operations, with AG-GRID for data display and add-to-cart functionality for ordering plants.

Technology: Angular 13, MVC Core, C#, User define datatypes.

Laptop RentalAliteTechnology.in

Description: A Laptop rental website with a laptop display page dynamically from an array of laptop details list that is common for the whole website. dynamic nav bar and footer using javascript additionally have search filter and shorting capability. Lastly, a laptop view page is also a dynamic page that takes a laptop ID and shows their data individually via query parameters.

Technology: HTML5, CSS3, Bootstrap 5, Javascript, JQuery

Educenter Delhieducenterdelhi.in

Description: Developed content for educenterdelhi.in, a dedicated educational support website for NIOS and IGNOU students. Curated and organized TMA practicals, sample PDFs, and solved papers, making essential study resources easily accessible. Focused on enhancing user engagement through clear, student-friendly materials to aid exam preparation and practical assignments.

Technology: HTML5, CSS3, JQuery, JSON, DataTable.

ACHIEVEMENTS & AWARDS

Participated in Hack-to-ber-fest Program in 2019 And Win.

Description: Collaborating on open-source projects and contributing through pull requests is a fantastic way to learn and grow in your development skills.
